

## **Free Native & Drought-Tolerant Landscaping Workshop**

Presented by Master Gardener Karen Petryna

Learn how to slowly convert to more drought-tolerant landscaping, particularly with the use of native plants.

Use of native plants in your landscape can reduce the amount of water, pesticides and fertilizer you need (saving time and money).

Natives also provide food sources to sustain our native wildlife, attracting pollinators and birds to your garden.

**Saturday, August 12, 2017  
10 am - 12 noon**

**Madera Community College Center**

**30277 Avenue 12 – Room R-3A, Madera, CA**

*(Free parking in Lot C near Three Sisters Demonstration Garden)*
